**Subject:** FW: West Lake Landfill: PRP efforts to access MDNR data on off-site background wells

Cecilia:

If Dan or Paul can coordinate with Shawn, we should be able to help. This is the first we've heard of a need for info. Some well info is available online, free to the public.

Aaron,

Can you help expedite this request. We will be taking split samples.

**Subject:** West Lake Landfill: PRP efforts to access MDNR data on off-site background wells

Cecilia, Ron,

The PRPs have made good progress in identifying potential off-site wells for background sampling during the next two rounds of groundwater sampling, but they are running into some delays at MDNR in accessing the information the state has. The PRPs want to start with that information so that when they approach the off-site facility directly (Weber Quarry, about 1 mile southwest of West Lake) they can speak intelligently about which wells they request access to. The PRPs plan to be in the field for the next groundwater sampling event starting July 8, but with the schedule set by MDNR below they won't be able to get information on those background wells in time.

Principles and integrity are expensive, but they are among the very few things worth having.

**Subject:** FOIA Request

Dan,

This e-mail summarizes our efforts to obtain access to documentation on monitoring wells and monitoring data from the Weber quarry / Progressive Waste Landfill property.

Per direction from you during last Wednesday's call that EPA wanted the Respondents to take the first steps towards obtaining access to monitoring wells on the Weber/Progressive Waste property, we contacted the MDNR records center to schedule a review documents relative to the locations, construction, and geologic logs for monitoring wells on the subject property and the most recent monitoring reports. Because those documents are not the filings by Republic, MDNR directed us that we needed to file a request under the Sunshine Act to review those files. We filed that request on Thursday June 13<sup>th</sup> and followed up with a phone call on Friday June 14<sup>th</sup> at which time MDNR indicated that due to a backlog on requests, the earliest they could provide the documents for review was July 9<sup>th</sup>.
